

my snowflake

by bernard

how I made this snowflake

I got onto snowflakes then I dragged from a corner to a place in the snowflake. then when I was happy with my snowflake I used the snipping tool to snip around it in a square shape then i went to file, and then i saved my snowflake then i made 6 very different snowflakes then i had to pick my favourite snowflake and i picked this snowflake we could do as much snowflakes as we could do i did 6 snowflakes when we time was up i just was in time finishing my snowflake

it took about 2 to 3 minutes for each snowflake for me to do my 6 snowflakes
